Dear Sir,

As we are aware the recent Psychological trend the world over, is to combat a piquant problem. High competition prevailing in every field including the medical service, is taking it's toll, of people getting frustrated, dismal, depressed and get burnt out, even at the middle age. The recent survey taken in Japan, gives out an alarming signal that people who want to climb the corporate ladder quickly, are landing in mental health centers in their forties. Why? It is because; to achieve their goal they have to "Run and Extra Mile". Organization which wants to achieve greater profits quickly, compared their competitors in their respective fields, dangle the "Additional Privileges Carrot" to their employees and exploit them fully to the brim. This makes the employees to work for more hours without rest. The tension that is created because of lack of rest coupled with a sense of high pressure and senseless competition, not only affect the adults but also the children. The parents want their children to out beat in every aspect in their life. This creates a compulsive Psychological fear, both in the minds of the parents and in the children and make them to put-in-their extra effort, resulting in psychological mental imbalances.

#### THE OBJECTIVES OF THE CONFERENCE

The objective is to educate, to challenge and to share the current practical knowledge, to cope, develop and live more effectively. This International convention gives the pleasure of meeting our brethren in our profession. The ideas expressed in depth knowledge explored, about the aspect of the theme, gives a positive approach and to update ourselves to serve better for the requirements of mankind. This convention also motivated future clinical Psychologist and Intellectuals who want to create an identity for themselves, when they start serving the society.

#### RATIONAL OF THE CONFERENCE

Man has made this world a glorious place to live in the phenomenal powers which have been threatening and persecuting mankind all along have been tamed and harnessed to serve him. The land which was barren and wild has been prepared to yield and abundance of food. People have grown from a primitive and barbarous state to be a civilized and intelligent society. The comforts and amenities provided are almost heavenly and man has been indulging in them without the least restraint. However, sitting amidst a mountain of wealth and prosperity man lives a life of worry, anxiety and dissatisfaction.

Through this conference a man must know his real identity if he desires to maintain a proper and healthy relationship with the world at large. Every human being is constituted of physical, mental and intellectual equipment and the conscious principle which lends sentience to these equipment. Human development culminates in finding one's identity with the conscious Principle-the-spiritual core of one's personality. The physical body is the grossest aspect of our personality. The mind is the subtler equipment and the intellect, the subtlest of the three. The three together constitute matter which by itself is inert and insentient. The consciousness is the Spirit in us which propels, motivates and causes these equipments to function. It is the combination of the two viz. Spirit and matter which causes the manifestation of life and activity.

The core of the human personality is the consciousness which is the life center around which all the activates of the body, mind and the intellect revolve. It remains ever changeless and immovable, but causes all changes and movements to occur. When man succeeds in identifying with this changeless, immovable, Conscious Principle within him, he is no longer victimized by the changing phenomena of perceptions, emotions and thoughts, but becomes the supreme lord of them all. The intellectual pursuits, emotional attachments and physical cravings of such a man naturally wither and fall away like petals when the fruit emerges.

Central Focus of this conference is to convey in changing situation that our life harmony with the ampler scheme of the cosmos brings to our heart on inward PEACE and POISE. When poise in maintained within us, problems and challenges vanish like mist before the rising sun.
